St. Louis April 24, in the student activities substitute manpower for horsepower during a chariot race.

Sigma Pi fraternity received the Greek Week trophy for amassing the greatest number of points in the Cave Group. The idea to start a club here began to materialize as Theresie Luth, a former member of St. Louis University Grotto, began to approach faculty members and students with suggestions concerning the topic, programs, topics of interest, and speakers.

Activities substitute manpower for horsepower during a chariot race.

Students, Faculty Mourn King's Death

On Monday, April 8 UMSL students and faculty members participated in a memorial service in honor of slain civil rights leader Martin Luther King. The 56 participants formed a ring and meditated a minute in silence. Then they sang such songs as "We Shall Overcome," "Freedom Now," and "Blowin' in the Wind."

The service was held at noon on the lawn in front of the Administration Building.

Dr. Masters Talks on Sex

The celebrated author of the book, "Human Sexual Response," Dr. William H. Masters, will present a lecture on "Facts and Fallacies of Human Sexual Response" on Friday, May 3 at 8 p.m. in Room 105, Benton Hall.

The lecture is sponsored by the Biology Department and the Biology Club. Admission is free.

Proceeds of the lecture will be donated to the Reproductive Biology Research Foundation, St. Louis, of which Dr. Masters is the research director. Coauthor of "Human Sexual Response" was Mrs. Masters, a research associate at the Foundation.

The book is the product of 11 years' research and study of the anatomy and physiology of human sexual response and represents a major breakthrough in the knowledge of human sexuality. Venturing beyond the efforts of Freud, Ellis, and Kinsey, Masters and Johnson have been able to record the physical reactions that occur when the human male and female respond to sexual stimulation.

Their scientific findings dispel many of the fantasies and fallacies about human sexuality that have disseminated by ignorance, taboos, and pseudoscience throughout the ages.

"Human Sexual Response," the first published volume of the author's findings, is primarily concerned with the sexual response cycles of men and women between the ages of 21 and 50, with emphasis on similarities in their sexual response patterns. Most of the text is devoted to male and female orgasmic expression. The authors' study of sexual response patterns in patients up to the age of 89 provides conclusive evidence that an increase in years does not necessarily mean a decline in sexual adequacy.
Orientation Needs Revision

If there are plans to hold an orientation session next fall, we think the current schedule is inadequate.

First of all, we think the discussion of the novel and the movie ought to be scrapped entirely. After all, almost everybody has seen Audie Murphy's system. There is no concern, and the effort of these actions on credits. They should be aware of such things as the meaning of course numbers in relation to upper and lower division classes, the procedure followed in the University Placement Office, honor courses, and the academic laboratories, as well as the system of advanced placement and the credit involved. They should also be instructed in University policies on such things as class attendance, academic dishonesty, and university regulations.

It may sound like we don't have fliers much credit for their ability to find these things out on their own, but isn't that a somewhat incorrect assumption? The current schedule, as is, is an overall (and not often an accurate) picture of his future program.

We think that an orientation program that shows the student how to use the University and efficiently will eliminate much of the confusion that is involved in freshman year, as well as many problems which occur later in devising schedules.

A.B.C. is Here

The apathy that prevails on this campus and in this country concerning the black problem is universal in scope and exceeds racial boundaries. Throughout the brief history of this country and school years ago from the time of the Declaration of Independence, the problem of reorienting the mind of man to that of a black person is a chronic one that has permeated the entire fabric of our society. To grieve for the death of a man thing to do.

Dr. King was a man who met greater accessibility that it did not rally to extremes. His position was a more unusual one, and his death of a more real implication. His position was a more precarious one, his stand-thing to do.

There were overtones of embarrassment that it did not "come to extremes." The small attendance could be a display of fear on the part of whites that in their guilt, their kindred would not be accepted. It could be a display of blame on the part of blacks that this loss is not to be made a public display rather than a real tribute.

The whole tone was one of separation. Two communities of fear--a feeble desire to show concern. Some of this concern was real--but the reaction was wrong.

The rally did more to separate than join. It showed apathy and an unwillingness to co-operate and to chart meaningful solutions to the problems of non-violent or lack of non-violence movements. It will be shown in the willingness of a man to be a hero in our society. To grieve for a dead president is the only thing to do.

Marvin Luther King was a personality more positive, more apt to be loved to extremes and hated by a lesser real implication. He will not be remembered for his death but for his life.

The rally at UMSL was feeble, embarrassing, an instant moment. There is no question of rallying near the basketball courts, or even the campus. Just a man thing to do.

Marvin Luther King was a personality more positive, more apt to be loved to extremes and hated by a lesser real implication. He will not be remembered for his death but for his life.

The Draft: Suggested Alternatives to the Present System

On examining the programs offered as alternatives to the present Selective Service System two things immediately occur. First, each is conceived with equity, and each is concerned with efficiency in manpower usage. This efficiency includes men in the civilian as well as in the military capacity. A proposal that has been given much public concern concerns the drafting of 19 year old first, instead of the present draft of older men first. In an article in the "St. Louis Globe-Democrat" of February 14, 1968 it was mentioned the average age group being drafted was between 20 and 21 years of age.

With the increasing draft calls and increasing demands for manpower in Vietnam, most universities are seriously concerned about the situation of their graduate school enrollment and supply of instructors for undergraduate classes. There are no longer "Blanket" deferments for all graduate students. Only students pursuing studies in medicine, dentistry, veterinary medicine, osteopathy, optometry, or the ministry are presently deferred.

In the "St. Louis Post-Dispatch," February 15, 1968, James Reston quoted these figures in his column: "Under the oldest first stipulation, according to statistics prepared by the Selective Service, more than one half of all men between the ages of 18 and 22 would be drafted in the year beginning July 1, 1968, more than one half of all men between the ages of 18 and 22 would be drafted in the year beginning July 1, 1968, more than one half of all men between the ages of 18 and 22 would be drafted."

One of the most valid and equitable proposals is that of random selection. Neither would show the favoritism of the present system nor the limitations of the present system. Both would provide a type of equity and a type of efficiency. One would enable a student to fulfill his service obligations and then obtain an education without interruption. The other would place everyone in an equally uncertain position. Both would provide sufficient graduate students, but one would insure completion of studies. Neither would show the favoritism by subject area that now exists. The lottery, not a new method, has also been recommended, in the essentially the same forms, by Senators Edward Kennedy and Clifford P. Case, and the Marshall Report. Senator Kennedy's program consists of five parts:

1. Random selection plan to be set up by the President.
2. A limit of four year deferments for students of liberal arts, junior and business colleges and apprenticeship and vocational programs.
3. No student deferments of any form for one year if casualty rates reach per month, 10 per cent of total men drafted for consecutive months. This would discontinue deferments during the Vietnam war, if casualty rates remain at the present level.
4. Uniform interpretation of draft laws by all local boards.

This program, similar to one suggested by the Marshall report, would place students in the draft pool only during a time when casualties were relatively high and great numbers of men were needed. Such a program would, indeed, by Don Schwarte place everyone under the specter of the draft at critical times, but it is obviously not fair; those who would wish to enter college or would be enrolled in college. If such a condition existed, it would discourage male college enrollments after high school and cause great uncertainty for college students planning their future. Also, since the Vietnam conflict is not officially considered a major war comparable to World War II, and the present Selective Service System is currently furnishing sufficient manpower with the present deferments in effect, it could be speculated that provision number three may, in effect, discriminate against students, instead of providing for greater equality.

U.S.M.L. Campus
Featured in Film

"Compass of the Mind," a novel about the four campuses of the University of Missouri, will be shown at 2 p.m. Wednesday, May 1 in Room 105 Benton Hall.

The 20-minute, color film explores the relationships between the four campuses and presents a glimpse into the life of a typical student on each campus. Several students and faculty members are shown in the portion of the film shot on the U.S.M.L. campus.

You say the phone company strikes you as a dull place to work?

If you have an idea the telephone business is uninteresting, monotonous and lacking in challenge—do us a favor. Talk to someone who works for Southwestern Bell.

Talk to last year's college graduate who now finds himself responsible for telephone service in an entire community.

Ask the young engineer in charge of a million-dollar expansion program how "dull" his days are.

Boring? Spend a few minutes with the technician planning vital microwave routes for defense installations.

Or question a sales representative who's just completed work on a nationwide data communications network.

Don't you believe it.

The business of our business is the lively art of communications. It's a look-ahead, on-your-toes, make-it-happen business.

But dull?

Don't you believe it!

Southwestern Bell
U. Players Present Osborne Play

By Sam Hackett, Features Editor

The University Players' production of John Osborne's Look Back in Anger April 5 and 6 was an important event in that group's short history and could very well be more important to its future. Simply by presenting this play, they have expressed an ambitious desire to contribute something to the academic (rather than social) life of the university, and I believe this is an important undertaking because of its experimental nature. The players do not yet have enough experience to give such a difficult play much more than an adequate production, but it is necessary to attempt serious drama in order to learn how to do it well. The biggest question was whether or not there was an audience at UMSL willing to support them while they grow. Audience response to Look Back in Anger seems to indicate that there is.

Involving and Exciting

Although the production was uneven, it was always involving and occasionally exciting. Much of the credit for this must go to John Nieman, who in the leading role of Jimmy Porter carried the heaviest load of dramatic responsibility. Look Back in Anger is Jimmy Porter's play. In it, this sensitive and explosive young man from the English working class expresses his anger at an unfeeling and slow-moving society in which nobody wishes to understand anything or anybody, least of all himself. It is a long and artistically demanding role, and Nieman's performance was strong and well controlled. It was a performance that any amateur could be proud of, but for a college freshman it was outstanding indeed. Nieman's obvious talent will be a valuable asset for the University Players in the future.

The performances of Mary Lacey as Jimmy's wife Allison and Stephen Heist as his best friend Cliff were even more fully realized (although their roles were less difficult). Lacey was able to make believable the great love for Jimmy in spite of his constant verbal and physical torture of her, for her society background. She achieved an admirable intensity of emotion without overacting. Heist provided much comic relief as well as a fine dramatic characterization as a man who is forced to act as referee between two people, both of whom he loves.

Susan Klemperer made her dramatic presence felt in spite of being miscast (both physically and temperamentally) as Allison's friend Helena who eventually takes her place in Jimmy's bed. Walter Holvsangs conveyed to the audience understanding of the character of Allison's slightly bewildered old-guard father, but he could not convey the feeling of old age.

Robert Macek's perceptive direction was evidenced in the performances as well as in his usually well-paced (there were a few slow spots) and well-balanced staging. Mike Jones' realistic set had a great deal to do with the production's success, Rev Nolte, who had leading roles in the last two University Players' productions, gave valuable service to this one as assistant director and last-minute stage manager.

ATTENTION STUDENTS

If you are graduating or do not plan to return to University of Missouri St. Louis in the fall, please check with the Cashier's Office before May 23rd.

SNEA Meets
Tuesday, April 30

The UML chapter of SNEA will hold an informal meeting on Tues., April 30, to hold elections for officers and to interest education majors into joining the club.

The meeting will last from 11:30 to 12:30 and will be held in room 208 in the Administration Building.

According to Sue Winter, president, the meeting is for majors in both secondary and elementary education, as well as for freshmen and sophomores interested in majoring in education. This is the first meeting of the club since last December.

Benefit for Injured People

The University Players will present a benefit performance of George Bernard Shaw's dramatic interlude Don Juan in Hell in room 165 Benton Hall, Sunday evening, May 5 at 8:00 p.m. All proceeds from the benefit will be given to UMSL student Stephen Heist, Heist, who played Cliff in the Players' recent production of Look Back in Anger, was involved in a serious traffic accident, which resulted in the loss of his right leg, while on his way to the scheduled Sunday night performance of the play.

Donations are $1.00 per ticket. Don Juan is an extended satiric dream scene from Shaw's Man and Superman. It deals, in Shaw's typically witty style, with both idealistic and realistic approaches to life. It will be staged as a reading with an experienced cast.

Krunchers, Marauders In Final

The spring session of intramural basketball began with snow and ended with rain. Games on four of the first seven days of play were postponed because of snow and rain. The last week of make-up games was played on schedule but the championship game, originally scheduled for April 19, was postponed until Tuesday, April 25. Results of the games were not available at press time.

The game matched Gold League Champions Kal’s Krunchers and Red League winners Marauders, each with final records of 8-0. Kal’s Krunchers won their championship on April 2 when they upset the previously unbeaten Stewos 53-51 in an exciting game. Cary Hammond of the Krunchers pumped in 29 points to lead all scorers. The Marauders qualified for the final game when they handed Sigma Pi their first defeat on April 4. Following are the final IM Basketball standings:

GOLD LEAGUE
Kal’s Krunchers 8-0
Stewos 6-2
Golds 5-3
Animal Farm 3-5
Gunners 3-5
Atomic Underwear 2-6
Pi Kappa Alpha 2-6
Reebs 1-7
Sainte 1-7

RED LEAGUE
Marauders 8-0
Sigma Pi 8-2
67 5-3
Armpits 4-4
Papal Bells 4-4
Sigma Tau Gamma 3-5
A & E Pi 2-6
Polyceptides 2-6
Cagers 2-6

No bones about McDonald’s Filet ‘O’ Fish!

Our Filet ‘O’ Fish sandwich is as boneless and tender as if you prepared it carefully at home! We use only deep-sea fish filets battered with our own special breading and quick-cooked in special shortening. Our tartar sauce was created by a famous chef and it’s blended fresh every day, right here! Result: the tastiest Filet ‘O’ Fish sandwich you’ve ever feasted on!

Golfers Now 2-4; Next Match Monday

By Jim Mantia

UMSL’s golf team has gotten off to a slow start in its inaugural season with a 2-4 record. Each match is made up of five or six individual contests between one UMSL player and one opponent player. One point is awarded for the low score on the first nine holes, one point for the low score on the back nine, and one point for the total low score. Ron Brewer holds the team record for the best nine-hole score, 36 against Westminster on April 5, and also the low total score, 76, which he shot in the same match.

The next match will be April 29, at 1:00 at Hillcrest Country Club, where the Rivermen will face Southeast Missouri State, April 30 and May 2 will both be home matches against Southern Illinois and St. Louis University respectively.

Sports Future Is Bright

By Mary Heedin, Sports Editor

In contrast to established schools such as Washington University, where the athletic program is dying, UMSL's athletic program is gaining sports and facilities each year.

The athletic program at UMSL began with basketball and tennis in 1966-67, added cross country and golf this year, and hopes to add soccer and baseball next year for a total of six inter-collegiate sports. With the completion of athletic facilities in the early 1970's, UMSL will add wrestling and track to its inter-collegiate schedule.

In addition to new sports, UMSL's main sport, basketball, continues to grow. Next season's schedule includes games against four new opponents--Missouri Southern, Southeast Missouri State, Nebraska State, and Little Rock University, plus home and away contest with SIU-Edwardsville. University of Illinois at Chicago and University of Wisconsin at Milwaukee.

The biggest boost to UMSL's athletic program will be the multi-purpose athletic field house to be constructed north of the softball diamond on the intramural field. The $3,000,000 multi-purpose structure will contain facilities for baseball, weightlifting, wrestling and gymnastics plus a swimming pool and 1600 seat gymnasium. In addition to the multi-purpose building, UMSL's athletic facilities will consist of a soccer field surrounded by a track, a large baseball field, new tennis courts, and a new intramural field.

According to John Perry, Director of Athletics, the construction of the new facilities will be completed in June. Coach Smith stated that, if approved, the league could not begin operation for a few years because of the football programs at Wayne State, UICC and UWM which could cause problems in scheduling.

Netmen Win First Matches

UMSL's tennis team, rained out of their first scheduled match of the season, won the first match that they played, 5-4 over Millikin University at Decatur, Illinois on April 4.

The Rivermen, who lost 5-4 to Millikin during last season's 2-8 campaign, were led to victory by their leading player Jim Rentz who won his singles match and teamed with Don Brindley to win a doubles contest. Brindley also won his singles match as did Kevin Daugherty. Stuart Lerner teamed with Daugherty to win their doubles.

The Rivermen played and won their second match of the season on April 22 when they defeated McKendree College 6-0.

The netmen's next match will be tomorrow when they play host to Millikin at 2:00 in the tennis courts in front of the Administration Building. It will be UMSL's first home match of the season.
