Where's the SCENE?

by Bruce Sommer

The Wall Street Journal and other major papers in our country have recently printed many articles concerning the inability of the business community to attract college graduates. Usually the main theme is that more and more students want to find means to work on many of our great social problems, rather than participate in an enterprise which merely has a profit motive. A student group at UMSL feels it has found a realistic answer to this dilemma.

In one of Dr. Kramer's latest urban sociology classes at UMSL, an article written by Robert J. Hellrung, a young attorney who is actively seeking solutions to our inner city problems, was read and led to a vigorous discussion. In his article, Hellrung stated as a central theme, "Individual initiative and that of the Community must be rekindled to meet the urban challenge. Solutions should be explored privately as a time-saving leading to governmental implementations, and also as a possible alternative to governmental involvement."

Being a Republican candidate and seeking to represent an "inner city" district which also includes downtown St. Louis, Hellrung added, "I have a unique opportunity to motivate the business community toward action in this regard, and I intend to use it where possible. Concerned individuals, however, are necessary ingredients of this motivation."

Following this discussion, some of the students decided to contact Bob Hellrung and see how they too could effectively work on inner city problems, even as young, inexperienced students. Students from the Political Science Chemistry, Sociology and other departments formed a group known as SCENE, "Students Creating an Effective New Environment."

Then, they met with Hellrung and became convinced that his ideas should be carried to the people. "Students of SCENE decided they could be most effective by working with Hellrung to organize a campaign that would help him win election as a representative to the Missouri Legislature from the city's 54th District. This action by SCENE has been welcomed by Hellrung and has proven to be highly successful."

These students are performing important organizational and effective grass-roots functions that have given them a feeling of real contribution and accomplishment. There is much work to be done and many more concerned individuals are needed on the SCENE, but the dilemma has been offered an effective solution.

Anyone who also feels the desire to be "effective now," is encouraged to contact UMSL student Bruce Sommer at YO 3-9639, or John Althoff at ST 1-9423.

Committee Selects Campus Leaders

Thirteen UMSL students were selected as outstanding campus leaders of 1967-68 by a student-faculty-administrative committee.

Those chosen are: Sue Estes, John Gragnani, Dennis McCarthy, Mary Killenberg, Randy Kote, Rick Galosy, Pat Soly, Sharon DesHa, Jane Moore, Beverly Kerr, Tom Bagan, Mary Burton and Allen Shearn.

Those awarded honorable mention in the campus-wide contest are: Ed Bellamy, Linda Kel- leher, Fran LaGreel, Phyllis Brandt, Mike Genovese and Beverly Brackney.

The student-faculty-administrative committee that made the selections considered only those students nominated in writing by any student, faculty member or administrator.

Eligibility of nominees was based on 1) scholastic accomplishments — a minimum 2.5 cumulative grade point average for at least 20 hours of credit at UMSL; 2) participation and leadership in academic and extracurricular activities; 3) service to the institution or the achievement of a distinction which has brought recognition to the University.

Robert Hellrung

Tom Eagleton

Talks on War

LA. Governor Thomas F. Eagleton, in speaking to a student gathering on May 17, stated that the war negotiations in Paris would not be quick.

Eagleton said: "The road ahead will be less painful if we reassure our foreign policy that each nation can determine how it wants to live. We have to reafirm the right of self-determination."

In addressing an overflow crowd in room 114, Eagleton also turned his attention to the question of civil disorders. The lieutenant governor feels that law and order must be maintained, "we have to try to understand the root of the disorder. You don't even have to live there, to perceive the frustration of ghetto life. Their education is inferior, their housing is inferior, their job opportunities are inferior, and they live with these things day in and day out.

Mr. Eagleton

Bader Heads Arts and Sciences

Dr. Robert S. Bader will become dean of the College of Arts and Sciences at UMSL, beginning September 1, 1968. The new dean was approved May 10 by the Board of Curators.

Dr. Bader, who is currently professor of zoology at the University of Illinois, has more than 16 years of teaching, research and administrative experience. His teaching range from introductory biology to evolutionary theory courses on the graduate level. He has served on numerous departmental, college and university committees and has been associate head and acting head of the Zoology Department at the University of Illinois. Dr. Bader has also served as a consultant evaluating many accrediting teams for the North Central Association, evaluating colleges, universities and academic programs in the North Central region of the United States.

He has been the recipient of two grants from the National Science Foundation, three grants from the University of Illinois Research Board and has authored more than 17 articles for scholarly publications.

He has participated in a workshop on pre-medical education for Negroes at Fisk University, the president of the University of Illinois' Allerton conference on undergraduate education and a conference of the Commission for Undergraduate Education in Biologiccal Sciences, sponsored by the National Science Foundation. He was nominated in 1966 for the Cleveland Newcomb Prize, awarded by the American Association for the Advancement of Science. The annual award is based on scholarly papers presented every year at the meeting of A.A.A.S.

Dr. Bader will succeed Dr. Glen R. Driccoll as dean of the College of Arts and Sciences. Dr. Driccoll, who has been dean of the college since his formation in 1965, will become dean of faculties at UMSL, effective July 1, 1968.

Dr. Bader's primary research interest is in the genetical variation of the development and character of teeth in rodents, with particular reference to evolutionary theory. His work combines the techniques and theory of evolution, genetics, anatomy and statistics. He is currently supervising the work of four graduate students in this area of research.

Dr. Bader received his B. S. degree from Kansas State University in 1949 and his Ph.D. from the University of Chicago in 1954. He has been at the University of Illinois since 1956. As new dean, he will be responsible for the supervision of the 11 departments of the college.

Biology Dept. Plans to Beautify Pond

The Biology Department has formulated a plan to beautify the pond near Benton Hall.

A very small capital outlay, student labor and plants supplied by the Missouri Conservation Commission will be enough to transform the pond area into a multiple-use recreation and education facility, according to Dr. James Heisinger, plan calls for re-inforcing and enlarging the dam at the west end of the pond. Some minor landscaping and planting will complete the perimeter. It is hoped that small mammals will frequent the area.

The pond will be an outdoor classroom for biology students, who are unable to go on field trips in the urban environment of the university. It will also provide an example of the proper management of natural resources. Possibly there will also be fishing, as the pond is well-stocked with bluegill and bass.

In order to explore the potential of the pond, members of the faculty and the Biology Club seized the lake on May 11. Fish were removed and weighed. A few scales were scraped from the fish to determine their age. Then the fish were tagged and released.
The Role of a Student Newspaper

The Current has finally completed its first full year of weekly publication. However, we feel there is still some ambiguity and disagreement in the minds of many as to the role that a student newspaper should play.

We admit we have not always fulfilled the function of a college paper even as we see it, but we feel that it is important nevertheless to have a clear idea of how and why we are in existence.

As we see it, there are choices available to the editorial staff of a paper like the Current. First, and perhaps easiest for all concerned, is the role of the Current as a bulletin, primarily listing what happened when and who is going with whom. We have tried to avoid this.

Although it seems to be popular to be radical, we likewise see little virtue in a paper which dwells on everything under the sun as a means of avoiding disagreement. Nor do we like the type of paper which exists solely as a mouthpiece for the Administration. Although we are aware that many people feel this accurately describes the Current, we have had our share of contention with the Administration.

And we feel this is good, because we feel that it is the purpose of a student newspaper to let students know what is happening on campus beyond this or that lecture in room 105. We feel that a student newspaper should be the undercurrents which presently exist on every campus. We feel it should take students behind the scenes to see how the University is run. We feel students should be aware of the forces, ideas, and proposals which are being developed to shape the future of their University. Too often students here do not even know what is going on until it’s over, or, like the situation with student government, until it explodes dramatically in their faces.

We do not like a system by which certain subjects are taboo. We feel that a student newspaper freely discussing and analyzing even touchy situations as soon as they are initiated. The philosophy of the program must be centered in free expression of attitudes and opinions.

If there is disagreement or disagreement in the community, we think this area of discussion should be explored by the newspaper. We hope to move more in this direction of probing indepth articles next year.

We cannot understand the horror of dissent that pervades the University of Missouri system. We think an atmosphere of disagreement and free discussion of this disagreement stimulates intellectual growth and thus contributes to the process of higher education. We see no purpose in stifling controversy when it exists. We see no harm in a student newspaper freely discussing and analyzing even touchy situations as long as the reporting is accurate and the sources reliable. We do not see a system by which certain subjects are taboo.

It is a system which stifles the progress and development of the academic atmosphere of the University.

Curators May Open Meetings

The Globe-Democrat recently reported with some astonishment that the Board of Curators of the Missouri University system is perhaps the only state university governing body that meets behind closed doors. This was no surprise to us.

We feel that since the Board of Curators now has control over a four campus state system of more than $40,000,000, that their decision making meetings should be open to the general press. The former system of gradual diffusion of facts through news releases several days later was archaic—the present system of gradual diffusion of facts through the general press. The former system of gradual diffusion of facts through the general press. The latter system of immediate publication. However, we feel there is still some ambiguity and dissatisfaction with the present system of gradual diffusion of facts through the general press.

We feel the only state university governing board that meets behind closed doors is the Board of Curators of the University of Missouri-St. Louis. It has not had the opportunity to move more in this direction of probing indepth articles next year.

We feel that the Board of Curators of the University of Missouri-St. Louis has finally completed its first full year of weekly article for the Current. The Current is the official student publication of the University of Missouri at St. Louis. It is printed weekly and funded through the Student Activities Fee. The Current office is located in the University Administration Building, Room 207, 801 North Lindell Blvd. Advertising and subscription rates are on request.

Afterthought: 1967-1968

by Michael Hughes

An alliance of concerned students and faculty members has been formed to bring about a more relevant and progressive student government, which can meet the needs of an increasingly activist student body. This is perhaps the last chance to make a peaceful change.

If a new student government, modeled by students, is brought about, the future will be bright for UML. Student government can then become involved, as an equal, in the policy-making of the University. There are problems which need a solution immediately; counseling, poor or irrelevant teaching, lack of active, meaningful student involvement and identification with the University.

In addition, the program of student activities must match the educational needs of UML students. Such programs as a controversial speaker series unabashedly administered by administrative censure, organizations which appeal to special interests such as ROBERT, ABC, RING, must be encouraged, and activities which encourage participation in the community must be initiated. The philosophy of the program must be centered in free expression of attitudes and opinions.

New Perspective

by Robert Frederick

There are many beliefs our society professes to hold which are not logically or logically formulated. One such belief is that all men are created equal. Another is that we all hold human life very dear; but in practice human life is of little importance.

Death is an everyday occurrence, but does it seem to concern us unless it comes to someone we love. How many times have we been incomplacent in a traffic accident which has caused a fatality, but we complain about being late to our dinner parties. Even if we become emotionally involved at all it will be by our curiosity that is aroused. We sometimes slow our cars or even stop to view the most recent car crash on the highways. Yet we hardly pause when we hear of a human life lost.

How many times have we been concerned with the fact that the world is becoming a less safe place? Did we become concerned when we heard that there were more accidents than ever before? Did we become concerned when we heard of a human life lost? Why do we not concern ourselves with the fact that the world is becoming a less safe place?

We must be concerned with the fact that the world is becoming a less safe place. If we continue to ignore the fact that the world is becoming a less safe place, we will continue to be disconnected from reality.

Death, even when it greatly affects us, is an everyday occurrence. We must be concerned with the fact that the world is becoming a less safe place. If we continue to ignore the fact that the world is becoming a less safe place, we will continue to be disconnected from reality.

We suggest that the world is becoming a less safe place. If we continue to ignore the fact that the world is becoming a less safe place, we will continue to be disconnected from reality.

Attention '68-69 Graduates

If any of the 1968 graduates have not received a questionnaire from the University Placement Office (UPD), please stop by Room 117, Administration Building, and pick one up. We would be most appreciative of your cooperation with this request.

We again urge the 1969 graduates to pick up forms for their Placement File. Remember, the employment center will be on campus in October 1968 and you may not interview with them until your file is complete.

Watts expressionistic photo of a peacock, which appeared in the Green Insert, was the outstanding entry in the field of photography.

Candidates Backs Professional Army

Hugh Scott, candidate in the Republican primary for Congressman of the Second District, suggested a professional army as a possible alternative to the present draft and the proposed lottery system at a lecture here on Thursday afternoon, May 16.

"We must question the hit-or-miss system, where some serve and some do not," the chairman of the St. Louis County Council said.

"The issue should be brought now to the halls of Congress," Scott said that the present draft system is "somewhat archaic." He noted that dependence on local draft boards has led to inequities in selecting draftees.

"The country can change its thinking and demand a professional army," he said, He suggested wages comparable to services in private firms for the professional soldier. The wage increase for this program would be less than the cost now for training new inductees, he said.

During a discussion period following the lecture, Scott charged that the military has opposed the professional army and insisted on the draft.

In answer to a question, Scott also said that "past commitments to foreign policy are absolute." He cited SEATO as an organization dominated by Western nations, but intended to aid Asian countries.

"We refuse to get our feet out of the clay and move about," he said.

In 1941, Scott enlisted in the American Field Service, where he asked the British Ambulance Corps in the Middle East. Later he returned to the United States and enlisted in the Marines, serving on the Pacific front. He also saw action in Korea.

The lecture was sponsored by the Young Republicans.

Student Discount: $50,000. Since the structure was still under construction at the time of fire, it had not formally become the property of the University.

RIDES · GAMES
Athletics Advanced Despite Lack of Facilities on Campus

Despite very limited facilities, the intercollegiate program has taken great strides forward during the 1967-68 school year. This success can be attributed to the fine young men who make up the athletic teams. Following is a detailed account of the teams.

Cross-Country Coach Larry Berres - Won 4, lost 6-12 squad men - 6 lettermen

Basketball - Coach Chuck Smith - Won 2, lost 7-12 squad men - 6 lettermen

Varsity Basketball - Coach Arnold Copeland - Won 8, lost 1-10 squad men - 5 lettermen

Junior Varsity Basketball - Coach Chuck Caldwell - won 13, lost 9-30 squad men - 12 lettermen

The basketball team received a bid to the NAIA playoffs in its first year of membership in the NAIA. Despite very limited facilities, the intercollegiate program has taken on an even more significant role in providing the student with the opportunity for physical activity. An intramural program, however, is no better than the students make it, and its success is most accurately measured through the amount of participation. During the past school year, we accommodated nearly 800 students in our program of organized activity including such activities as flag football, basketball, women's volleyball, tennis, cross country, softball, co-ed volleyball and men's volleyball. Even with the extremely limited facilities we have at present on our campus, this number indicates a level of participation in the area of 20%, which is significantly higher than the average of other commuter campuses.

With the construction of the new multipurpose building taking some of our intramural activities back of the campus, we will be under some additional handicaps for the next few years, but in spite of this fact we hope to not only continue the programs we already have, but also to institute new activities to meet the needs of our increasing student body and their widening variety of interests. Shown below are the organized intramural activities conducted at UMSL during the past school year and the approximate number of students enrolled in these activities:

SPEED READING

College students should have a reading rate of 400 words per minute with 75 per cent comprehension on standard college material or they will experience academic difficulty. The average college student, however, reads at a rate of 250 words per minute.

If you are an average, or above average, reader, you can improve your grades by increasing your rate of reading and comprehension this summer at the:

DeCoursey Reading Improvement Laboratory

TWO SUMMER SESSIONS

First Session: June 10 through July 15. Second Session: July 22 through August 26.

These sessions meet twice per week for 2 hours, 15 minutes:

Mon. and Wed. or Tues. and Thurs.

Choice of Three Times

9:15-11:30 A.M. 1:30-3:45 P.M. 7:15-9:30 P.M.

REGISTRATION MAY 20 THROUGH JUNE 6

Golf Ends First Season Tuesday  
by Jim Mantia

The UMSL golf team has just closed out its first season. The final match on Tuesday against SIU-Edwardsville was played too late for the results to be published; however, the Rivermen went into that game with a 5-6 regular season record for the season.

Although the record is not spectacular, Coach Larry Berres feels that the team did well and was much impressed by the progress they made during the season. For example, they won 4 of their last 7 regular season matches, all against good competition, after a slow 1-4 start.

Player's Scores
Ron Brewer, who led the team all year, was the top scorer with 23 points, Steve Loughner was second with 15 1/2 points. A complete list of individual scoring is as follows:

<table>
<thead>
<tr>
<th>Player</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>

Caldwell Picked by San Diego Rockies
Chuck Caldwell, a 6'4" guard on the UMSL basketball team, received word May 16 that he had been drafted by the San Diego Rockets of the National Basketball Association. Caldwell was not notified of his selection by Jack McMahon, head coach and general manager of the Rockets, before his services were lost to the Rivermen due to scholastic difficulties shortly before the end of the 1967-68 season. Caldwell was told by coach Brummett that he should have performed better against Millikin and Concordia. Brummett named Washington University and McKendree as his top two choices for the draft list, and no other basketball player to be drafted by a professional team. Caldwell felt that the Rivermen were "ever-inexperienced team which included the freshmen and two sophomores. The coach did not name an outstanding player for the first award program because he did not feel that there was a most valuable player on the team. Brummett has told each player what to work on for next year. He expects the players to keep in shape over the summer by playing in tournaments.

Caldwell will be drafted by the San Diego Rockets to be drafted by a professional team. Not a regular "round" pick, Caldwell will be picked by the Rocke-t's pre-season training camp this summer on the club's "supplementary" draft list, and no other professional basketball team will be able to review his talents unless he is released by the San Diego franchise.
Me attend a Reading Dynamics demonstration?

I don't have time!

Are you up to your ears in fallout from the information explosion? Your problem is not unknown. You may think you know how much of what you want to read, but how much of what you are reading do you really want to read?

How much of what you need to read . . . do you read?

Today's businessman or student is expected to read about 20 times as much material as he did only 10 years ago. And he reads only about 250 to 400 words a minute, on an average. This means that he needs a 400-hour day, just to keep up!

If you're in this predicament ... struggling to keep up with your work, with no time for pleasure . . . it's no wonder you think you don't have time to find out about Reading Dynamics.

The fact is, you can't afford not to take time!

Learn to Read 3 to 10 Times Faster

You can't add hours to your day, but you can multiply your reading speed . . . 3 to 10 times, in eight short weeks . . . by learning to read Dynamically.

Think of it! Read the average novel in less than two hours. A newspaper, cover to cover, in 20 minutes. A magazine in 10 minutes or less. This is in 10 seconds!

Without skipping, skimming, machines or tricks. And you'll understand and recall more of what you read than before.

Incredible?

True! If you don't at least triple your reading speed, with good comprehension, the course won't cost you a cent!

Dynamic Reading Will Change Your Life!

It isn't easy. Nothing worthwhile ever is. Learning to read Dynamically means work. Once a week in class, plus practice every day. But at the end of eight weeks, you will have changed your life!

You'll read more, understand more, enjoy more, be enjoyed more, cross unimagined horizons to a happier, more fruitful life!

Come to a Reading Dynamics demonstration. See someone just like you read two, three, four thousand words a minute, with excellent comprehension and recall . . . someone who did well eight weeks ago to read much faster than a fourth-grader.

Ask any questions which occur to you. We'll answer them all with facts. And we won't sell you. You'll sell yourself, as you imagine what Dynamic Reading can mean for you.

Plan now to attend a Reading Dynamics demonstration near you. There's no obligation at all . . . except the obligation to yourself.

COME TO A FREE DEMONSTRATION. THERE'S ONE NEAR YOU. YOU COULD WIN A SCHOLARSHIP
