Search Committee Announces Criteria

The search committee for a new chancellor to replace Dr. James L. Bugg Jr., has announced the establishment of criteria for the chancellorship.

The committee adopted the following statement:

"The Chancellor must be: cognizant of and in sympathy with the accelerating expectations now focused on universities, He must be able to translate these expectations into goals and policies for an emerging university distinguished in learning, research, and public service. The realization of the University's potential will require in the Chancellor personal and intellectual characteristics of such quality as to generate excitement and a sense of involvement among students, faculty and others concerned with the campus.

"The Chancellor must be an administrator of exceptional executive ability, able to delegate executive authority, and in sympathy with the values of responsible administration. He must have the ability to work effectively within the multi-campus framework of the University of Missouri and the state.

"The Chancellor must be a generalist in spirit, and with a commitment to diversity in his academic institution. (Continued on page 5)"

Central Council Forms Committee To Replace Student Union Board

by Matt Mattingly

A bitter, heated debate marked the birth of the Activities Planning Committee, intended to replace the Student Union Board which collapsed along with the student government last year.

The initial motion, which sparked the controversy, was posed by Judy Allen, chairman of the committee which drew up the blueprint for the Activities Planning Committee. It stated: "I move that the Activities Planning Committee be established to contain nine students, two of whom will be representatives of the Central Council and the remaining seven from the student body at large, and two faculty members and the director of Student Affairs. Its powers shall be under the Office of Student Affairs."

The motion encountered stiff resistance, but failed after a confusing passage through parliamentary procedure.

Judy Allen, when asked to comment on the success of her motion, told a Current reporter, "I think that the fact that the motion was passed is a significant thing, because it completely breaks with tradition and hopefully will establish a new precedent." In other business, the Executive Committee made public its list of standing committees. These are the Publications, Programming, Safety, Grievances, and Evening College Problems Committees.

Joe Bono raised the question of skaters in the library, disrupting student study efforts. The Central Council member to protests to the librarian about the noise.

Central Council member to protest to the librarian about the noise. The Council approved a motion by Matt Mattingly

Students Asked to Answer Survey

by Carol Pratt, News Editor

UMSL students are being asked to answer a University wide survey, sponsored by the Office of Student Affairs, during their spring semester registration. The "1969 Student Services Census" as it is called, is designed to enable students to report their opinions of the University, to give a brief outline of their background and personality, and to anticipate their use of specific student services. No student is required to answer all or any of the questions, as indicated in the directions on the front page of the form. All that is required is that students write their student number on the same line as the question, and if they wish to answer the question, then circle the number indicated in the directions.

A copy of the survey is available in the ex-Current Office, now used by the Office of Student Affairs as a storage room.

A photo by M. J. Olds

Central Council Forms Committee To Replace Student Union Board

by Matt Mattingly

A bitter, heated debate marked the birth of the Activities Planning Committee, intended to replace the Student Union Board which collapsed along with the student government last year.

The initial motion, which sparked the controversy, was posed by Judy Allen, chairman of the committee which drew up the blueprint for the Activities Planning Committee. It stated: "I move that the Activities Planning Committee be established to contain nine students, two of whom will be representatives of the Central Council and the remaining seven from the student body at large, and two faculty members and the director of Student Affairs. Its powers shall be under the Office of Student Affairs."

The motion encountered stiff resistance, but failed after a confusing passage through parliamentary procedure.

Judy Allen, when asked to comment on the success of her motion, told a Current reporter, "I think that the fact that the motion was passed is a significant thing, because it completely breaks with tradition and hopefully will establish a new precedent." In other business, the Executive Committee made public its list of standing committees. These are the Publications, Programming, Safety, Grievances, and Evening College Problems Committees.

Joe Bono raised the question of skaters in the library, disrupting student study efforts. The Council appointed Bono and one other Council member to protest to the librarian about the noise. The Council approved a motion

Need for Health Center Critical, Says Eckhoff

by Adrienne Beaudoin

Dr. Harold Eckhoff, Dean of Student Affairs, expressed deep concern over the need for a student health service in an interview with a Current reporter last week. "The matter has become so critical that a highly urgent request has been made in the budget for the funding of a student health service," Dean Eckhoff said.

Dean Eckhoff said he was "not sure the absence of a student health service deserves the attention it's been getting on the grounds of previously presented arguments. The administration has been criticized, and rightly so, for the lack of a nurse on campus. Criticism has been directed at the failure of qualified personnel to be available to come to the scene of an emergency." He stressed that UMSL has emergency medical facilities as close to the campus as does the University in Columbia. In all emergencies requiring medical attention, the student is taken to Normandy Osteopathic Hospital unless otherwise specified. An ambulance service is also available. The University pays the bill for the ambulance expenses.

Duties of Nurse

The primary duties of the campus nurse, as outlined by Dean Eckhoff would be the following:

1) Handling an emergency accident health service. This would include the revision and updating of student medical records and the systematic review of and publicity about the emergency procedure to be followed.

2) Using her practical and administrative experience to evaluate the existing emergency procedure.

3) Taking charge of a small infirmary. The infirmary would include a small bed for students too ill to leave the campus immediately. A small medicine cabinet, possibly containing nothing more than band aids and aspirin, would also be available.

In the event of an emergency, the following procedure exists. When the emergency is noticed, the observer should:

1) Call Dean Eckhoff in the office of Student Affairs between 8:00 a.m. and 5:00 p.m. or the evening college after 5:00 p.m. Give the student's name and student number if known. Dean Eckhoff will call the ambulance if it is needed.

2) Send someone at the scene of the emergency to meet the ambulance and direct them to the student.

As soon as the call reaches the office of Student Affairs, the following action is taken:

(Continued on page 3)

Hearnes' Request Trims Budget For University

Governor Warren Hearnes requested $85 million in state funds for the University of Missouri system in his budget address to the Missouri Legislature Thursday, January 9. This request represents a $12 million drop from the $97.1 million sought by the University. It also represents a $2.9 million dollar increase from the $82.1 million dollars recommended by State Comptroller and Budget Director John Olds. Governor Hearnes' request also restored a little more than $1 million in capital improvements funds for the University, which had asked for $36 million. Vaughan's budget had denied the University and all other state agencies capital improvements money.

Although the Governor told legislators that he would favor a tax increase if he were a legislator, he made no direct plea for a boost in tax revenues, saying it was unnecessary and would not be sufficient to meet the rapidity rising cost of state services.

Speaking to the Governor's budget appeals hearing November 25, University of Missouri President John Vaughan warned that enrollment would have to be cut or reduced and research cutbacks if the budget cuts were not restored.

President Vaughan stated November 21 that a cut-back of $9 million would cripple the University in competition with other academic institutions.
Editorials

The Race for Space

The recent announcement by Chancellor Bugg that steps will be taken to open a new lounge for students in the Math-Language Building was quite refreshing. It is not secret that the problem of student study space has reached outrageous proportions at UMSL. Enrollment has increased faster than construction, causing a student vs. space dilemma.

The problem is especially evident during the winter months, with the use of outdoor study space hardly being feasible. Under these conditions there is overcrowding in the cafeteria, library, and the few lounges previously provided for this need.

Although many students felt that Benton lounge should be re-opened for study space, few can argue with the Chancellor's contention that the lounge should continue to serve as the sole meeting place on campus for student organizations.

In addition to the initial step of providing a lounge in ML, the Chancellor also announced that there is a possibility that classroom and the few lounges previously provided for this area.

We believe that such rooms are present in all of the other university buildings and can easily be transformed into lounges (if the need persists).

Students and the few lounges previously provided for student use.

In our opinion, no university can be great unless it is a city of learning, and the library is the center of the city of learning. We believe that the library has no place where a student can smoke. It is complete and functioning at its best capacity.

It is thus apparent that Chancellor Bugg and his associates are not totally blind to student needs. In fact, these recent announcements show that he is willing to re-think his position at UMSL and consider student strike and flexibility in policy decisions. These are admirable assets for a growing university in an age of student-faculty unrest.

Library: The Impossible Year

Although the library is open, there is no reason to assume that it is complete and functioning at its best capacity. It is far from being able to rest on its laurels.

It is almost useless to mention that the chairs and tables seem to have come from an abandoned bingo game -- but it's the tables and chairs that will still be there tomorrow. It has been realized by many students that the library has no place where a student can smoke. We believe that the library should not be limited to the one in the basement.

Although the library should have made better provision to see that students do not become out of sight without checking them out. It would seem that this would be of primary importance to the librarians.

Now that the construction of the library is completed, we cannot help but wonder how the librarians plan to prevent the exit between the fourth and fifth floors. It is, however, a little late to do anything about that unless, perhaps, a hole could be cut in the ceiling of the fourth floor which could be closed when the need arises.

Finally, the intellectual atmosphere of the library is far from enhanced by the painters and carpenters milling through the library.

We shyly wait until they begin carving that Thomas Jefferson quotation into the wall of the main floor.

In our opinion, no university can be a great library, a great university is a great library. We hope that they realize this and do their best to boost UMSL's library to the proper caliber.

Letter Policy

Because of the many letters that have recently been submitted to our editorial staff, the Current feels it necessary to establish a few definite guidelines relating to this area.

We request that letters of 200 words or less will receive greater priority towards publication than those of a greater length. The name of the writer must accompany each letter (although it may be withheld by request), the Current reserves the right to submit this to a student vote by January. In addition we choose to decide upon it ourselves. This is for two reasons. First of all because of the time and cost of printing and final examinations, it was impossible to submit this to a student vote by January. In addition we decide to do it as a public service for the representatives of the student government.

The purpose of these guidelines is not to discourage the discussion of editorial opinions by the faculty or students. It is, rather, necessary to establish such policy in order to allow for more views to be heard per issue. Ideally, it would be desirable to print all views expressed. However, this is not always feasible in student publications of limited size.

To Lead Missouri

Those interested in the University of Missouri were not the only ones disappointed by the August session of the General Assembly. Governor Warren Hearnes, an old friend, delivered Thursday, January 9. Governor described the shaky financial condition of the state of Missouri, but he did not call for action to ease this condition. Despite the knowledge that Missouri is floundering in the area of state services, Governor Hearnes failed to show any concern for the safety of the state's expenditures, declaring that he would favor a tax increase if he were a legislator.

He is not, however, a legislator: he is the Governor of Missouri, the first to be elected to two consecutive terms. As Governor, it is his responsibility to provide the leadership for the state, not to transfer himself to the shoes of a legislator. If Missouri is to progress in the area of state services, then a tax increase is necessary; and if a tax increase is needed, then the leadership of the Governor is required.

Correction

The Current wishes to correct a statement appearing in the article "Accounting Club Elects Officers" in the January 9, issue. The club has not yet elected its officers for the fall semester. It will hold elections for officers approximately the third or fourth week of the second semester. Anyone interested in joining the club may fill out data sheets, which can be obtained from Mr. Kargus in room 205 of the Administration Building.

Letters: Misrepresentation and the Library

Dear Sir:

In the Jan 9 issue of the Current we would like to make the following points:

1. Chancellor Bugg expressed his intentions of asking for a raise of $2.50, later being used to complete the furnishing of the new Student Activity Center. This was not asked, nor did it give advice concerning this matter.

2. The Chancellor then asked the Council the following question: Since I am going to suggest a raise of $2.50, should I at this time ask for an additional $2.50 for use in Student Activities?

This was the question which the Council was asked, and did it give advice concerning this matter. In short, this raise was going to be suggested regardless of Council action.

3. Only one of the two Evening School members present voted against the $2.50 increase. This was the only negative vote cast.

4. The Council approved the $2.50 increase, under the condition that we be consulted about the disbursement of the money into Student Activity fees. This will help to guarantee that the students will get some direct benefits from the raising of the fees.

5. As a point of general information, $10 of the present $15 fee, and $12.50 of the proposed $20 fee, will be used in furnishing the Student Activity Center. These furnishings include such things as the cafeteria, snack bar, desks, etc. The answer to the question, "What's going on out of the Student Fee?" lies here. Most of the fees goes into the furnishing of the Student Activity Center. Ground breaking for the center is scheduled for this year.

Thank you.

Central Council

Current wishes to correct a statement appearing in the article "Misrepresentation and the Library" in the January 9, issue. In the Jan 9 issue of the Current we would like to make the following points:

Central Council
The Department of Chemistry has been awarded grants in excess of $47,000, including two for undergraduate research. A fourth grant has received tentative approval.

Dr. David W. Larsen and Dr. Alan F. Bersdrt, associate professors, have received an $8,000 grant for research in the field of carbohydrate chemistry. This project is being directed by the Office of Water Resources Research, administered by the University of Missouri system.

Dr. Eric Block, assistant professor, has been awarded $15,000 by the Petroleum Research Fund of the American Chemical Society for "Studies in Carbocycle Synthesis." The two-year grant starting September 1, 1969, is a "Type B Award," designated for fundamental research in the petroleum field at the undergraduate level. Matching funds totaling $4000 will be supplied from UMSL's budget next year.

Health Center

(continued from page 1)

1) The student's health form, filled out as a requirement for admission to the University, is found in the file. This form was designed by Dr. Galvano, director of the student health service at the University. It contains the essential information about any physical abnormalities the student may have. The medical information contained on the form is given to the ambulance drivers to facilitate their correct handling of the patient.

2) The parents are called.

3) The doctor is called to meet the ambulance at the hospital. Dean Eckhoff said that every effort is made to talk to the doctor personally.

4) Dean Eckhoff goes to the scene of the emergency. Dean Eckhoff stated that "although the process seems complicated, once the call is received, a file is opened in the operating room in three to four minutes and has worked smoothly in most instances."

Procedure Used

The emergency procedure was used this semester in two cases of epileptic seizure, one in the library and the other in a classroom.

The emergency procedure was also used Friday, January 10, Miss Mary Colleen Grelle, sophomore, was watching an ice hockey game on the shore of Bugg Lake. During the game, a participant lost his balance and fell into the ice, accidentally striking her in the forehead. After the Trauma and Security Office and Dean Eckhoff were notified, Miss Grelle was taken to Normandy Osteopathic Hospital by the campus police. The laceration required seven stitches.

Visa on Sunday

Meet my 63¢ dinner date.

"Because McDonald's is a kind of place, you don't really know who we have a hamburger or a cheeseburger in our hands, and a straw--for about six for each of us! Yes sir, that's why McDonald's is a kind of place.

McDonald's is your kind of place.

CARSON IN NATURAL BRIDGE

Spend Semester Break With...
The Loretto-Hilton company is currently presenting in its repertoire two dramatic masterpieces of the first decade of this century—Shaw’s Major Barbara and Gorky’s The Lower Depths. The two plays are on most grounds of comparison extremely different (most glaring is the stylistic difference between Shaw’s social comedy and Gorky’s drama of realistic naturalism), but there is an important similarity. Both playwrights concerned themselves with the importance of the individual man in relation to society. Therefore, they were aware of both the tragic and the comic nature of that relationship.

Major Barbara

In Major Barbara Shaw uses his sharp-pointed pen against society’s hypocritical value system. He sets the altruistic Salvation Army, in the person of the title co-owner of a huge munitions company, against the completely economically dependent upon them. This hypocrisy is not its worst fault; its greatest is that a man’s soul has been saved in their care and, therefore, under his charity. The actors do little more than go through the motions and, if they are not involved in the play how can they expect the audience to be. The most interesting performances (Donald Gantry, J. Robert Dietz, and James Scott) are interesting more for their technique than for their characterization. The Lower Depths is a simpler but more important play than Major Barbara. It contains both an expression of naturalistic determinism in the dignity of man, Gorky seems to be saying that perhaps man cannot rise above the ever-present evilness and despair in life, but because man is all there is he must try; he must believe in himself.

Russian Flop-house

The play is set in a Russian flop-house which is inhabited by an assortment of people who express varying degrees of misery, despair and boredom. An old pilgrim comes among them and momentarily shows them happiness, kindness, and hope. His efforts to do good are almost complete failures, but the people he has touched cannot forget him. His faith is not born of innocent ignorance but exists in spite of an awareness and understanding of all that is wrong with life.

Rare Sensitivity

The Loretto-Hilton production of The Lower Depths is excellent. James Bernardi’s direction displays a rare sensitivity for the meanings and intentions of the playwright. It is neither didactic nor depressing. It is a detailed realistic picture of Gorky’s view of life. It is marked by its variety of characters and moods. It is, in essence, tragicomic. Bernardi weaves a collection of exceptional acting performances into a true ensemble.

Special Achievements

I feel compelled to give special mention to three other individuals who, as well as Bernardi, deserve to be highlighted for special achievements in this production. Bernie Pasettelin’s performance as Loka, the kindly old pilgrim, is beautiful. It ranks among the best in this company’s short history. John Wright Steventon’s shabbily set and Peter E. Sargent’s evocative lighting combine to create a marvelously effective environment.

Christmas Project Helps Underprivileged Families

A Christmas project, initiated by Elka Silverman, president of the Evening College Council, resulted in the sponsorship of three underprivileged families who live in and around the Loretto-Hilton Project. The families of the names of the families, only one of which has a father living at home, were supplied by the St. Vincent de Paul Society.

Donations came from Dr. Joy Whitmer, Dean of the Evening College, Mr. Lou Kozloff of Oakbrook Variety Store, Glaser Drug Store, Mrs. Donald Nelson of St. Louis County, the Reverend David Winters (an Evening College student), members of the Evening College Council, and a number of administration staff and faculty members and other evening students.

Miss Silverman first became interested in aiding underprivileged families following a conversation with Dominic Baldiolo, a former UMSL instructor, who in the spring of 1966 solicited help after a fire burned out a large family in the Market street area. In addition to collecting and delivering the gifts, Miss Silverman spent at least one evening with each family.

Living in the “w” home were the mother and the father, twins, eight months old, girls 3, 3, 6, and 14 years old, and a boy 5 years of age, Mrs. “W” lives with an infant daughter and boys 2, 4, and 5. A second Mrs. “W” has boys ages 2 1/2, 5, and 5. A girl 10.

Five children from one of the families were supplied with shoes, thanks largely to Mrs. Nelson’s contribution. Reverend Winters’ donation, enabled the Council to purchase for the father of the “w” family a pair of high boots, a gift that will enable him to continue working in a position he obtained just prior to the beginning of the holidays. All children in the three families received clothing and at least five toys each. All family members were given a stuffed stocking. Both Mr. Kozloff and Glaser Drugs donated new ornaments and tinsel for a Christmas tree supplied last year by Oakbrook Variety Store.

U.P. Auditions

The University Players will hold open auditions for their spring production of Frak Gilroy’s The Subject Was Roses February 5 from 4 till 6 p.m. and February 7 from 7 till 9 p.m. in room 105 Benton Hall. The production which will be directed by James Paul will be presented April 11, 12, and 13.

Fiddler’s Highlights Break Theatre

The theatrical activity in St. Louis during UMSL’s semester break will be highlighted by the return engagement of the musical Fiddler on the Roof at the American Theater January 28 - February 15. The leading role of Tuvie will be played by Paul Lipsen who had the part the last time the musical played here. His performance then was outstanding. Its fulfillment of both the comic and serious aspects of its characterization. The character of Tuvie along with Bock and Harnick’s score a Jerome Robbins’ staging make this one of the best musicals in recent years.

Loretto-Hilton’s Repertory Theatre will offer four plays, three of which have been reviewed in the Current. The best of these are fine productions of O’Neill’s Long Day’s Journey into Night and Gorky’s The Lower Depths. Shaw’s Major Barbara is a good play which is given a disappointing production. Shakespeare’s Much Ado About Nothing will join the repertory January 31 after low-priced previews January 29 and 30.

APO Book Pool

The APO student book pool for the 1969 Winter Semester will offer book-selling and purchasing opportunities to students from 9 a.m. to 9 p.m. weekdays, January 28 through February 13 in room 208 of the Administration Building.

Under the book pool system, students pay ten cents for a printed form to list the titles and prices of texts they wish to sell. If sold, the student receives the full asking price for his text. The student purchasing the text pays a small service charge, which goes to the APO-sponsored scholarship fund, helping to defray expenses involved in operating the book pool.

All unsold texts and the money from sold books are returned to the student.

January 16, 1969
Darst Attacks Jury System

David Darst, proponent of civil disobedience, called for a more representative jury system in a Noon-Day lecture Forum lecture Wednesday, January 8.

Darst, who was convicted and later acquitted on a charge of burning Federal draft files, said jurors should be chosen to judge a person not only on whether or not he committed a certain act occurred, but also on the validity of the law itself.

"When it comes to consider a case," he said, "the jury should take all possible factors into account. A man should be judged by a jury that includes those of his peer group. Too often the minority groups have been neglected."

Darst argued that in his case the issue was not the destruction of government property, but the symbolic act of displaying a flag that is part of the defense for the Vietnam war. The jury should have "judged the case and also the conscience," he said.

An outspoken critic of the Vietnam war, Darst said, "I am referring to the methods of civil disobedience when the ordinary means for dissent are closed. The demonstrator turns himself in for due process of law because he acts in the name of society."

Darst said a distinction should be made between personal and public morality, "in which a Federal law exists has no particular respect to the methods of civil disobedience the moment the ordinary means for dissent are closed. The demonstrator turns himself in for due process of law because he acts in the name of society.""The purpose of civil disobedience is to make concrete that which is abstract. The burning of draft files was a symbolic protest of moral indignation against the war for all to see," he said.

Gym, Scheduling Problems Plague Homecoming

Two problems remain in the plans for homecoming 1969. One results from the particular weekend homecoming is scheduled and the other from construction. Construction of Normandy High School's new gym has been delayed. Two games scheduled there had to be transferred to Florissant Valley Community College. There is still some uncertainty about the gym's completion in time for homecoming. However, the contractors have promised that the gym will be ready by February 7. They will know definitely by January 27 if it will be completed in time and will notify Coach Smith.

Louis IX Room

The other problem is the weekend on which the homecoming activities have been scheduled. All the halls and hotel ballrooms were booked far in advance because it is Valentine's Day weekend. When Pi Kappa Alpha tried to rent a ballroom, there was a cancellation, making the Louis IX room in Union Station available. The dance was originally scheduled for Saturday, February 15 but the Louis IX room is available Friday, February 14 only. Therefore, the dance will begin about an hour after the end of the basketball game.

Attempts are being made to move the starting time of the game up half an hour (to 7:30 p.m.), because of the dance. Hopefully, the dance will begin at 10:00 p.m. and end at 2:00 a.m. Dress sem-formal and the cost is two dollars per couple, one dollar a person.

Parade to Game

The parade being handled by Sigma Tau Gamma, Rules and entry blanks have been put in all organization mailboxes. There are three alternate routes for the parade, the primary one to be decided upon by Sigma Tau Gamma and the police chiefs of the involved municipality. There will be trophies for the first, second, and third place winners in the car decorations.

Half-time entertainment, courtesy of Newman Club, will consist only of the presentation of the trophies for the car decorations and the lawn displays and the introduction of the five finalists in the homecoming queen contest.

Social Disorders Institute

The UMSL Extension Division is co-sponsoring an Institute on Social Disorder from 9:00 a.m. to 5:00 p.m. Saturday, January 25, in Benton Hall. Cooperating with the Extension Division in the project is the St. Louis Federal Executive Board.

The Institute is designed to initiate meaningful discussion of the problems of social injustice and law violation, and to determine what steps can be taken to effect prevention and control in Missouri and Illinois metropolitan areas.

Featured speakers include Miss Virginia Burns, an expert on juvenile delinquency with the U.S. Department of Health, Education and Welfare; John C. Danforth, attorney general of Missouri; and Dr. Norman Johnson and Jr. Jerome Balsuhock, both of the UMSL Department of Sociology-Archipology.

Topics to be discussed include the prevention of social disorder through metropolitan planning, the role of the law enforcement agency, and the individual's capacity to effect change within the community. Participating in the conference will be a number of nationally prominent officials including: William R. Doushet, executive director of the Urban League of St. Louis; James O. Roche Jr., chairman of the Mayor's Crime Reduction Task Force; Judge Theodore McMullan, St. Louis Juvenile Court; Judge Michael J. Carroll, St. Louis Circuit Court; Lawrence Devis, Franklin County prosecuting attorney; William Dye, assistant to the director of the St. Clair County Illinois Crime Commission; Walter Buehner, sheriff of Jefferson County.

The funds will be used to provide financial aid to students in the new Administration of Justice Program started last fall. The program leads to a bachelor of science degree. A total of 35 students, 26 of whom are law enforcement personnel and persons wishing to enter the law enforcement field, Loans up to $1,800 per academic year and grants up to $500 per semester may be made under the Act.

Some information on the starting time of the ballgame and the final time the parade will end have been scheduled for Saturday, February 15. There will be a skit written by Mike Spector, some cheers led by the cheerleaders, and a few words about the Rivermen by Coach Chuck Smith. The Steamer Club is also sponsoring a contest among the students for the best as a way to promote the song fight. There will be prizes awarded for the organization knowing the fight song best and their ability to get members together to sing it loudest. This contest will take place at the rally.

Funds Awarded

UMSL has received $34,000 from the U.S. Department of Justice under the Omnibus Crime Control and Safe Streets Act of 1968, to provide financial aid to students in the new Administration of Justice Program started last fall. The program leads to a bachelor of science degree. A total of 35 students, 26 of whom are law enforcement personnel and persons wishing to enter the law enforcement field, Loans up to $1,800 per academic year and grants up to $500 per semester may be made under the Act.

Two problems remain in the plans for homecoming 1969. One results from the particular weekend homecoming is scheduled and the other from construction. Construction of Normandy High School's new gym has been delayed. Two games scheduled there had to be transferred to Florissant Valley Community College. There is still some uncertainty about the gym's completion in time for homecoming. However, the contractors have promised that the gym will be ready by February 7. They will know definitely by January 27 if it will be completed in time and will notify Coach Smith.

Social Disorders Institute

The UMSL Extension Division is co-sponsoring an Institute on Social Disorder from 9:00 a.m. to 5:00 p.m. Saturday, January 25, in Benton Hall. Cooperating with the Extension Division in the project is the St. Louis Federal Executive Board.

The Institute is designed to initiate meaningful discussion of the problems of social injustice and law violation, and to determine what steps can be taken to effect prevention and control in Missouri and Illinois metropolitan areas.

Featured speakers include Miss Virginia Burns, an expert on juvenile delinquency with the U.S. Department of Health, Education and Welfare; John C. Danforth, attorney general of Missouri; and Dr. Norman Johnson and Jr. Jerome Balsuhock, both of the UMSL Department of Sociology-Archipology.

Topics to be discussed include the prevention of social disorder through metropolitan planning, the role of the law enforcement agency, and the individual's capacity to effect change within the community. Participating in the conference will be a number of nationally prominent officials including: William R. Doushet, executive director of the Urban League of St. Louis; James O. Roche Jr., chairman of the Mayor's Crime Reduction Task Force; Judge Theodore McMullan, St. Louis Juvenile Court; Judge Michael J. Carroll, St. Louis Circuit Court; Lawrence Devis, Franklin County prosecuting attorney; William Dye, assistant to the director of the St. Clair County Illinois Crime Commission; Walter Buehner, sheriff of Jefferson County.

The funds will be used to provide financial aid to students in the new Administration of Justice Program started last fall. The program leads to a bachelor of science degree. A total of 35 students, 26 of whom are law enforcement personnel and persons wishing to enter the law enforcement field, Loans up to $1,800 per academic year and grants up to $500 per semester may be made under the Act.

Rivermen End McKendree Streak With 93-88 Victory

by Marty Hendin, Sports Editor

Led by the second half rebounding and scoring of Greg Daust and "Doody" Rohn, the Rivermen defeated the McKendree Bears 93-88 January 29, and ended McKendree's twelve-game winning streak. The game was played before a fanatical standing room only crowd at the McKendree gymnasium in Lebanon, Illinois.

Daust and Rohn grabbed 27 points and grabbed more than twenty rebounds between them in the second half as UMSL made up for a 41-42 McKendree lead at halftime.

UMSL jumped off to an early lead in the game, but McKendree took over and opened up a seven point bulge midway through the first half. The Rivermen fought back and tied the score at 29 all with eight minutes to go. McKendree then jumped ahead again, but UMSL regaled the lead 46-39 on two Verle Sutton free throws with 1:12 left in the half. McKendree's Perry Florek scored to put the Bears back on top with 51 seconds left but Jack Stenner regaled the UMSL lead with two free throws. With three seconds left in the half, McKendree's Paul Funkhouser scored to give the Bears their 43-42 half time lead. Greg Daust led St. Louis scorers with 15 points while Funkhouser had 14 for the Bears.

McKendree continued their lead at the beginning of the second half until "Doody" Rohn popped in two baskets to tie the score at 48 all. The lead saw back and forth until Rohn's basket put UMSL into a 60-59 lead with 1:20 left in the game. The Rivermen quickly jumped into a seven point lead but McKendree closed the gap to trail only 70-67 with 9:52 to go.

For the next two minutes the Rivermen reeled off ten straight points on two baskets by Daust and baskets by Sutton, Slaughter and Caldwell, as Daust's rebounding started the UMSL fast break. The Bears quickly jumped into a seven point lead but McKendree closed the gap to trail only 70-67 with 9:52 to go.

UMSL scored to make it 89-81 but McKendree closed again in true only 89-85 with 1:52 left. Jack Stenner's free throw made it 90-85 but a Bearcat basket made the score 90-87 with 53 seconds left. Stenner's field goal took the pressure off and Rohn's free throw put UMSL ahead 93-87. A McKendree free throw with 13 seconds left accounted for the final 93-88 margin.

Greg Daust led all scorers with 28 points as he tied his UMSL high. "Doody" Rohn scored 18 points, Verle Sutton 15 and Jack Stenner 13 in his first starting effort after sitting out three games with a sprained ankle. McKendre's Mike Finley and Terry Florek scored 28 points each to lead Bearcat scorers while Paul Funkhouser had 19 points and Dennis Korte 17. Daust grabbed 19 rebounds and Rohn collected 13.

The Rivermen now have a record of 6-3 with four wins in a row, including three on the road. For the season, the UMSLans are 5-0 at home and 3-3 on the road.

According to UMSL coach Chuck Smith, the Rivermen followed their game plan well. He felt that the turning point of the game occurred when the Rivermen started their fast break in the second half.
**JV Wins in Overtime; Now 4-2**  
by Jerry Visky

The UMSL JV lost to Boys Club Thursday, January 9, by the score of 83-89. The loss was the second in a row and the second of the season. Two days later on January 11, the Rivermen played one of their finest games to beat McKendree College in overtime 82-74 and boost their record to 4-2.

The poor start gave Boys Club a 42-20 lead at the half. Bob Sahnietz led Boys Club with 24 points. Mark Bernsen and Ben Phillips again led the Rivermen with 24 points. Mark Bernsen and Ben Phillips again led the Rivermen with 24 points. Mark Bernsen and Ben Phillips again led the Rivermen with 24 points.

The loss was the second half. The poor start gave Boys Club a 42-20 lead at the half. Bob Sahnietz led Boys Club with 24 points. Mark Bernsen and Ben Phillips again led the Rivermen with 24 points. Mark Bernsen and Ben Phillips again led the Rivermen with 24 points.

The JV played Scott Air Base Tuesday January 14, but scores of the game were unavailable at the time of publication, Friday, January 21, will be the rematch of UMSL against Forest Park Jr College.

"A computer has no mind of its own. Its 'brainpower' comes from the people who create the programs," says Rod Campany.

Rod earned a B.S. in Math in 1966. Today, he's an IBM Systems Programmer working on a portion of Operating System/360, a hierarchy of programs that allows a computer to schedule and control most of its own operations.

A mixture of science and art

"Programming" means writing the instructions that enable a computer to do its job. Says Rod, "It's a mixture of science and art. You're a scientist in the sense that you have to analyze problems in a completely logical way.

But you don't necessarily hunt for an ultimate right answer. There can be as many solutions to a programming problem as there are programmers. That's where the art comes in. Any given program may work, but how well it works depends entirely on the ingenuity of the programmer."

Programmers hold a key position in the country's fastest growing major industry—information processing. Business Week reports that the computer market is expanding about 20 percent a year.

You don't need a technical degree

If you can think logically and like to solve problems, you could become an IBM programmer no matter what your major. We'll start you off with up to twenty-six weeks of classroom and practical training.
