In a recent Current interview, Central Council chairman Sam Bommarito said he supported the move to transfer the student-body president because such a salary would "provide the equivalent of the income from a part-time job." According to Bommarito, without a "supplemental income," the student-body president would be "penalized" for his services to the school.

"If you look at the past four or five student governments, it's evident that their performance in the second semester was inferior to their performance in the first," Bommarito said. "A supplemental income would ease the strain and prevent the inevitable second semester slump from taking place."

A Current reporter asked Bommarito if his grade point could prevent the inevitable second semester slump from taking place. "I'd go with 33%, but I can see the problems that could be inherent with this number of students," Bommarito said. "We're looking at a smaller percentage of students, and we could have some difficulty getting enough students to participate."

The problem first became apparent in mid-February, when dead fish began to appear along the shore of the pond. The biology department requested the aid of the Missouri Department of Conservation and immediately began tests on the water and some of the stricken fish.

Dr. Frank H. Moyer, chairman of the biology department, said, "This is a matter of great concern to the department, because there is a major source of pollution -- a large pond represents a major water source in teaching and research, and we are determined to solve the problem."

The department will confer with the physical plant to learn which pesticides have been used, and when Dr. Moyer said, "This knowledge, in conjunction with the report of the Missouri Department of Conservation, should lead to identification of the toxin so that further pollution can be prevented."

The problem of eliminating the poisonous substances in the pond is now added to a list of less urgent, but still very important, issues. The biology department, and the university's landscape architect, had been scheduled for last fall, at the southeast bank of Bugg Lake, to repair the leak in the spillway. "At that time, students and administrative officials would have to be more fully aware of their responsibilities in sharing in the administrative processes," the Chancellor said.

"The kinds of changes in the universities which have occurred in the past 10-15 years, in which the faculty has taken a larger role, will in the same respect occur for students, as in which they share in administrative decisions on campus, and I think that this is good."

At the next meeting of the Faculty Senate, Chancellor James L. Bugg, Jr., will introduce a proposal that students be allowed as full voting members of the Faculty Senate. The Chancellor said that the plan could go into effect as early as the fall semester.

"This plan would require a change in the Faculty by-laws, which would require an all-faculty vote," the Chancellor said. "When I introduced a general proposal at the last meeting of the Executive Committee, the opinion was generally favorable, although we did not get down to specifics."

Dr. Bugg said that the main question is whether the Senate membership should be comprised of students. Suggestions from his student advisory council ranged from 25% to 53%.

"I suppose if I had my way, I'd go with 33%, but I can see the problems that could be inherent with this number of students, and we could have some difficulty getting enough students to participate."

The proposal would be taken under consideration at that time.
Suppression of Expression

On March 19, four students of the University of Missouri-Columbia were scheduled to appear in Magistrate Court on the charge of selling "obscene" literature.

The charge stemmed from the distribution by the students of an underground newspaper, The Columbia Free Press. The paper contained a front page cartoon stating a policy of the State of Liberty. Also, the text of the paper possessed many four-letter words.

This case and the recent statement by President Weaver on obscenity appear to be warnings intended to suppress any expression which university officials deem objectionable.

The question remains, however, whether university officials (or any other officials) have the right to judge anything as being obscene or not.

Does a position in a university administration qualify a person to make personal moral decisions for another? Do we have the right to make so-called "high morals" a general education requirement?

The final decision as to what is obscene and what isn't appears that when the university administration speaks of "freedom of speech," they have the right to say they have the right to make such decisions.

Dear Editor,

I am writing in regard to the letter of March 13, which was written by the Association of Black Collegians.

Foresighted person that I am, I predict that this letter, written by them, will bring about a storm of protest that the content of the ABC letter, though emphatically true, is stupid, unjustified, and many other goodies.

Therefore, may I suggest a compromise name of another great American, someone who might be acceptable, then surely a mutually acceptable to both black and white students. Since the former ML Building is now Clark Hall, and assuming that this is the same Clark who explored the western United States, how about naming the library the Lewis Library, after his equally famous partner.

Certainly, Victor A. Brown (a black student)
P.S.: If the name Lewis is not acceptable, then surely a mutually acceptable "Great American" can be found, somewhere.

Dear Editor:

When I read the letter from the ABC's about the naming of our library, my first reaction was probably like that of a great many other people. I thought it was making a fuss over nothing.

Yet when I re-read it a couple times I realized that to these students it was not a trivial thing. What's more they let their point of view be known for anyone of us white people who care to know. I think it's time to get the question off the table--to let it be known to the public that there is nothing offensive about this type of communication.

The manner in which this letter was worded indicated to me that the ABC was not trying to be belligerent. They simply made known their feelings on this matter. Had they not spoken, few of us would have ever realized that something was bothering them. At least you might consider it important, they do.

I do think it is worth pointing out to the ABC, however, that the library was probably named for Thomas Jefferson because of the quotation of his that will be carved in the marble wall. It reads "This Institution will be based on all the principles of the Jeffersonian philosophy."

In response to the Central Council's call for students to serve on student-faculty committees, an estimated 30 to 40 applications have been submitted. This response was about as expected according to Sam Bommarito, Central Council Chairman.

The Committee on Student Affairs and Committee on Curriculum and Instruction drew the greatest number of applications. Eight students applied for the five-member student court. After the application deadline there were still vacancies for the Committees on the University Library and Urban Affairs, which will be filled as second choice positions of applicants.

The one-semester-old Community Involvement Committee is seeking student volunteers to place in welfare and community projects. C.I.C. was organized by Jane Burnhardt and Jane Alexander under the advisement of Dr. John Boswell, assistant professor of psychology. It acts primarily as a recruiting station for the Volunteer Improvement Program and the Citizens Volunteer Corps.

Garbell spoke at the Noonday Forum last month after the showing of the movie "Tell It Like It Is" which explained the V.I.P. and C.V.C. programs. Miss Burnhardt said that after the showing, about 15 students requested more information and have become potential volunteers.

A green 1965 Triumph Spitfire was stolen from the parking lot V near the first curve at the top of the hill Thursday afternoon, March 6. Current photographer Bill Leslie, a freshman, had parked and locked his car at 1 p.m. When he returned after a chemistry laboratory class, four hours later, the car was gone.

Leslie reported the theft to campus police who "thought I might have only misplaced it." After a 10 minute search, campus police filed a missing car report with the St. Louis County Police.

"The county police were supposed to send out a telegram to St. Louis City police that same day," Leslie said. "When I called city police Friday, they had not yet received the telegram. They received it Monday."

Leslie may submit a request for a refund of the time unused on his parking permit.

The library will close at 5:00 p.m. Friday, March 28, and will be closed for the weekend. Beginning Monday, March 31 through Friday, April 4, the library will be open from 8:00 a.m. to 5 p.m. and will be closed April 5 and 6. The library's hours on Monday, April 7 will be 7:30 p.m. to midnight.

Two Separate, Diverging Communities -- One Black, One White

by Ron Brown, News Editor

UMSL has two separate communities—one black, one white. Drawn apart by academic discrimination, the paths of each segment are quietly diverging. The minority black community is developing apart from the mainstream of academic life and social activities.

The number of black students is determined. The Admissions Office as a result of the Brown vs. Board of Education decision does not classify students on the basis of color.

Among a faculty of 285 are six full time black members: Dr. Marcus Allen, associate professor of French; Mary Burgin, instructor in English; Dr. Arthur Littleton, associate professor of education; and Dr. Doris F. Mosby, assistant professor of psychology. Two part time faculty members are Richard Massey, a voice and drama teacher and Robert Mansco, instructor in English.

The UMSL black student is a first generation college student who leads two lives; one as a commuter who spends 15 hours in transit and the other as an inner city resident among the urban problems discussed abstractly in his textbooks—such as housing, high unemployment rate and rising incidence of crimes.

"No One Knows"

"Black students feel that no one knows anything about their problems except themselves," said Dr. Mosby, who is a member of the Counseling Service. "They have to think about the source of next year's fees and often this means working full time as well as being a full time student.

"Another problem is where to study. The conditions at home are too crowded and at school are too limited," she said.

The Association of Black Collegians plays an active role in the black community, but the problems between its members are deeper than social-oriented organizations. It neither has, nor needs a simple leader.

"A strong people don't need any one particular leader," said Michael Jones, ABC representative to the Central Council. "Anyone of us can figure out what the other lacks. We are bound together by a black man's respect for each other.

"In a University manual on student organizations, the ABC is listed as having students; however, Dr. Robert Mansco said "all enrolled black students" are considered to be a member. By comparison, no black students are members of the six fraternities and two sororities, Sigma Tau Greek and Phi Beta Kappa. Mansco said one black student had expressed an interest this semester, but later decided not to pledge. Representatives of the other Greek groups said few black students have applied for membership during their histories. ABC nominated Miss Laboyce as Miss UMSL.

Although both communities use the lunch facilities in the blue building during class, black students sit on the right and white students on the left.

Tom, a sophomore, as a candidate for Miss UMSL in November. She won the election over four white contestants. Tom praised Miss Stevens for possessing "tremendous awareness of being a black student." Two weeks ago Chancellor James L. Beattie Jr. agreed to provide $2,000-$2,500 to bring a black leader of national reputation to the campus. The Chancellor stipulated that such an "academic program" will be sponsored by (and must have the consent of) the Central Council and that the money would not be simply turned over to ABC.

In contrast to ABC members at Washington University who occupied the chancellor's office and at Meramec Community College who staged a sit-in demonstration in front of the dean of students office, the UMSL group has presented its demands less openly but most militantly.

Last year in January ABC members met in a closed session with Dr. Harold Eichhoff, Dean of Students Affairs, and other administration leaders.

"Two things were brought to our attention," said Dean Eichhoff. One was that the University provided no social programming which was attractive to black students and the other was a result that the University was a whole remained unattractive." He told the students to return at a later date with specific suggestions.

Study Planned

Last semester in November the students presented a plan for a housing complex led by students, that would be directed towards only blacks and taught only by black faculty.

The administration response was friendly, but we believed the plan did not make sense in terms of the totalities of the university," said Dean Eichhoff. "Since curriculum changes must be approved by the faculty, the plans would have to connect them to the department chairmen of each academic department office, the Central Council and the deans of each school.

Dr. Eichhoff said the chancellor had said he would not make sense in terms of the totalities of the University. "I feel the University as a whole is nothing but a racist education system," he said. "Last year in January ABC members considered a student body who staged a sit-in demonstration in front of the dean of student's office.

Dr. Eichhoff said. "It was the first time in my eight years here that students organized and presented demands and that the University is organized and responded with proposals.

Black students believe that much of their college education has been irrelevant. Jones, a history major, said: "If America is a racist country, then you will get a racist education.

"The history of Western civilization is nothing but colonization and exploitation, viewed from a non-white perspective. The West raped the rest of the world.

the black and white communities may be misleading. In a speech in December, Charles Koen, Midwest Director of the Students Non-Violent Coordinating Committee, warned that racial troubles at UMSL would arise “maybe not in the next few months, but it will come.” Black students view campus life as an extension of the world outside UMSL’s boundaries.

“Our problem is not as, but basically white Americans,” Jones said. “If revolutionary change is needed to let the black American live, then it will be a revolt against the white system that has suppressed him.

“Black students can join any campus organization as long as there aren’t too many; however, the result too often is tokenism.”

“A company will hire black people now because it wants to show him and say that ‘this man went to his course’ but he does—internally,” he said.

Trice, who moved from north St. Louis to University City, said when he arrived in his new neighborhood, “white people asked my parents if they were professional people. It seems a black has to be a professor to live with whites who have a grade school education and work in a factory.”

Trice said whites will not solve its racial problems until “something happens so bad that their interests are affected.” He said UMSL and the rest of the world will have such a “catastrophic event.”

Dr. Allen, who studied at the University of Pittsburgh, said frustra
tions were separated along racial lines, but the dormitories where he lived were integrated. While a graduate student, he was the only black student in his area working towards a doctorate.

Dean Eckleboff said that the UMSL black student, unlike his professors before him, is not a member of a separate community. “I am skeptical of viewing UMSL as two worlds because I do not think there is a conscious effort by blacks or whites to be separatists,” he said.

Angel Flight Revises Pledging

Angel Flight is considering a proposal to revise its pledge program. Instead of rushing in the fall, it will rush at the beginning of the second semester. The Flight hopes this program will offset the loss in membership each year.

The flight will initiate a pledge class equal to the number of actives lost. In this way it will be able to start each year with a full membership. A rush program will begin in April.

In other activities the Flight will celebrate its anniversary dinner March 21 at Lombardo’s and will join the Air Force and Army ROTC cadets March 28 for their Military Ball.

Normandy Bank

Between homework and classes, there’s little time left for leisure; don’t spend it running around to pay your bills or purchase money orders. A mere $5 stamp will deliver your check. Your cancelled check is your receipt. Your check book will help you manage your money more wisely and help prepare you for business or homemaking in the near future.

Bean Raffle

Alpha Xi Delta will sponsor a bean raffle from Monday, March 24 through Friday, March 28. The jar of beans will be displayed in the cafeteria and in the first floor of Benton Hall. The cost will be 10 cents per guess or a quarter for three guesses. Three names will be drawn with the one closest to the actual number winning the $20 first prize. Second and third prizes also will be offered.
University Establishes Three Programs on International Relations

by Adrienne Beaudoin

International relations and affairs have been given a place in the University system with the establishment of three programs. Two are University projects, the third particular to UMSL alone. The programs for the four campuses are the Center for International Studies (CIRUNA), whose president is Miss Cynthia Smyrniotis; the University's Office of International Studies (OIS), directed by Dr. George Putnam, associate professor of political science; and the Midwest Model United Nations (MMUN), which is being sponsored by Dr. G. J. Reischauer, professor of political science. Two are University projects, the third particular to UMSL alone.

The Center for International Studies (CIRUNA) was established at UMSL by the Board of Governors in 1961. Its purpose is to promote international study and understanding. The Center's activities will begin next fall with the establishment of three programs. The center hopes its success will encourage other American educational institutions to establish similar programs.

The first is for departmental and University consumption in the form of speaking engagements and special projects. The second category is of a more specialized nature including the Midwest Model United Nations and the Washington University seminar program.

Mr. Hintz was particularly concerned with the representation in the MMUN and the academic advantages of such a program. "The University should be represented in the MMUN. This should be on a broad basis as possible. The delegation should not be a closed group, but preferably chosen by some sort of open process. This is as good a learning experience as any in-class academic program, and it should be included in the University's scope.

CIRUNA outlined its plans for the fall semester in an interview with the Current. These include a United Nations Day Tribute, a prominent international figure is being sought for a lecture on that day. Miss Smyrniotis said, "This is one of CIRUNA-UMSL's most important dates as it is also founder's day on campus." Once established as a representative country to the Midwest Model United Nations, CIRUNA will host several activities in connection with the country. A panel discussion concentrating on the economic, political and historic aspects, an open forum on the country's "hotest issues" with a guest speaker and a mock strategy study of the country in a crisis will be presented. These programs will be preliminary to the Center for International Studies, Miss Smyrniotis said, "The Center for International Studies is the classroom academic part of international relations; CIRUNA is the out-of-classroom aspect of it.

CIRUNA is the means of reaching the students."

Mr. Stephen E. Hintz, an instructor in political science and CIRUNA's faculty advisor, said that "CIRUNA is an academic extension. It should be department wide at a minimum and should have a core membership. The program should not be limited to the political science department but should be extended to the audience at large. The tendency in the past has been to consider organizations like CIRUNA as special interest groups. This should be gotten away from.

Two Categories

"CIRUNA's activities have two categories," said Mr. Hintz. "The first is for departmental and University consumption in the form of speaking engagements and special projects. The second category is of a more specialized nature including the Midwest Model United Nations and the Washington University seminar program."

Mr. Hintz was particularly concerned with the representation in the MMUN and the academic advantages of such a program. "The University should be represented in the MMUN. This should be on a broad basis as possible. The delegation should not be a closed group, but preferably chosen by some sort of open process. This is as good a learning experience as any in-class academic program, and it should be included in the University's scope."

University Establishes Three Programs on International Relations

Paul R. Schratz

War College in Newport, Rhode Island. From there he went to the Joint Chiefs of Staff Office in Washington, D.C. In 1963, Schratz was a member of the United States delegation to the Eighteen Nation Disarmament Conference in Geneva, Switzerland.

The Center hopes to begin interdisciplinary courses similar to "The City" which is being offered this semester. The course is under the direction of the Chancellor on each of the four campuses. The executive committee of the Center system is composed of the director of each Center, the director of the Office of International Studies, and a faculty member from each campus. UMSL's faculty member is Dr. Roy Gene Burns, associate professor of history.
High Point Ends UMSL Dream

High Point College used their three guard offense against the Rivermen, and it paid off in a 12-22 victory for the North Carolina school in the first round of the NAIA national tournament March 11 in Kansas City.

Playing with a 6-0 All-American Eugene Littles and 5-9 Jim Colbert at guards at 6-0 Danny Witt playing at forward but shooting from outside like a guard, the Purple Panthers ran by the Rivermen with a finely executed fast break. The Rivermen took a quick 10-4 lead as they hit their first five shots of the game. High Point took over to lead 22-19 at 1220 left in the first half. The lead then saw-saw back and forth with High Point holding a 53-49 advantage at halftime. Witt and Littles led first half scorers with 18 and 16 points respectively with Greg Daust scoring 12, Jack Stenner 12 and Danny Caldwell 10 for the Rivermen.

Brenner’s basket at the start of the second half narrowed the lead to 53-51. That was as close as UMSL could come as the Riv­­ermen turned cold and High Point jumped out to a 63-53 lead with 16:20 left in the game. The Pan­­thers took the biggest lead of the night at 84-67 before UMSL came back to trail 95-85 with 2:25 remaining in the game. They could get no closer however, and wound up on the short end of the 102-90 final.

Littles was the game’s high scorer with 31 points, Witt had 28 and Colbert 12 as three guards scored 72 points. Forward Steve Tatgenhorst scored 16 points and 4-0 center Jim Pica added 10 points and 10 rebounds.

Daust played one of his best games of the year as he collected 25 points and 19 rebounds. Caldwell had 16 points, Doody Rohn 14 and Verle Sutton 10. Rivermen star Jack Stenner fouled out of his final game with 1:12 left, and was given a one-minute standing ovation by the 209 UMSL fans among the 8400 people in attendance. Sten­­ner ended with 17 points in the game, 50 for the year, and 158 for his three-year career.

High Point shot .562 from the field and .769 from the free throw line as opposed to UMSL’s .480 and .687. Both teams had 36 rebounds.

UMSL ended their third year of inter-collegiate competition with a 19-7 record for a .685 win percentage. The Rivermen are now 44-23 (.675) in the three years. The fourth-seeded High Point Pan­­thers finished the year at 29-3 after getting to the quarterfinals of the tour­­nament before losing to eventual champion Eastern New Mexi­­co.

Spring Sports To Begin Soon

Beginning in April spring sports will take over the UMSL activities calendar.

UMSL’s first baseball team, coached by Arnold Copeland, will play its first game Saturday, April 5, against SIU-Edwardsville. The game will begin at 1:00 at Forest­­wood Park, the site of all home games. Forestwood is located at 825 Ferguson Avenue, west of Florissant behind Universal Match Company.

Forty-five people are trying out for the baseball team and half of them want to pitch. The base­­ball team’s pitching staff is being guided by Ron Kinney who is using the St. Louis Cardinals method.

Three are top prospects for starting pitchers, Tim Krull and Bill Coats. The season will consist of 21 games, 10 of which will be home games. According to Coach Arnold Copeland, St. Louis University will be the toughest opponent of the season. The teams will meet once at St. Louis’ field and once here at home.

Coach Larry Berres’ golfers will inaugurate their second season when they take part in the Gulf American Classic April 2-5 at Naples, Florida. Home matches will be played at Creve Coeur Golf Club.

The opening of golf will mark the return of five UMSL let­­termen. They are Tom Craddock, Kent Aufderheide, Steve Loughner, Den­­ny Chester and Steve Chamberlin.

The golf schedule is stronger due to the addition of such teams as Culver-Stocks­­ton and Illinois College.

The tennis team, coached by Dr. Carl Helmreich, will begin their season April 2 at Washington Univer­­sity. The men’s will be trying to rebound from a 2-7 season last year.

Lettermen Stuart Lerner Don Brindley, Mike Lehman and Kevin Dougherty will return to the UMSL. Tennis team this season. The ten­­nis schedule includes many fami­­liar names, such as Washington Univer­­sity, St. Louis University, Millikin University, Southwest Missouri State and Drury College.

Intramural News

Girls interested in playing girls IM basketball should submit rosters of not more than eight girls to the athletic office, room 17 of the blue metal office building, by Monday March 24. The sea­­son will start March 27.

Cagers Pick All Opponent Squad

Jeese Price's second straight unanimous selection highlights UMSL's 1968-69 all-opponent team.

In addition to Price, a forward from Millikin University, the team consists of forward Tom Reikowski of Wisconsin-Milwaukee, center Fideo Hart of Southern Illinois University's top five players, and guard Ron MclAf of Southern Illinois University's Eugene Littles of High Point.

The leading scorer in Millikin history, Price collected 18 points and 14 rebounds against Memphis, and guards Ron MclAf of Southern Illinois University and Eugene Littles of High Point.

Point's kin history, Price collected 18 unanimous selection highlights Opponent from Millikin University, the team Littles scored 31 points in High UMSL's 98-75 win over team.

Fredrick, Ray Lavender and Ro- UMSL's points, Boys Club 8 6 t 6 tosses this season for a .755 Verle Valley Stenner 1968-69: 23 games, 560 points, 24.3 Most points in a season -- three free throws in each game, Stenner now owns the following season--112 '(1967-68) 11.6 average; 1967-68: 21 For. Jack now owns the following scoring records:

For. Jack says his next ambition is to play pro basketball. All of us who have had the privilege of seeing him play this year realize that he's leaving some mighty big shoes to fill; and while there are a lot of talented basketball players around, there are few with the dedication of Mr. Jack Stenner.

Stenner recently added another honor to his accomplishments as he was named by his teammates as their most valuable player for the second straight year.

Jack has not finished his career as a basketball star for UMSL. He will be among twenty Missouri college basketball all-stars chosen by former MU-Columbia coach Bob Vanatta to play in a heart fund benefit game Saturday March 29 in Springfield, a city that thought it saw the last of Stenner two weeks ago.

Rivermen Review

UMSL's Most Valuable Player

by Jack Connors

Up at 6:00, at work from 7:00 to 4:00, basketball practice from 4:30 to 6:30, classes from 6:45 to 9:45, home at 5:45, dinner, homework, and finally bed. A rough schedule? Undoubtedly; but 6'3" senior guard Jack Stenner followed it, and led his team to a 19-7 record and a berth in the NAIA National Tournament.

But Jack's accomplishments don't end there. He spearheaded a fast break which enabled the Rivermen to score over 90 points seventeen times; he scored 41 points in a single game, breaking the school record he had set the year before; he scored over 30 points in his three-year career; he averaged over 22 points per game in both his junior and senior years; this year he scored 558 points, and averaged over 24 per game (at one time he was averaging over 30); he led the Rivermen in scoring in sixteen of the twenty-two games he played, including nine of the last ten, and four of the five games in the NAIA; and he was the team leader in assists. On top of all this Jack managed to be named to the District Sixteen All-Star team two years in a row and get a 3.5 grade point last semester, giving him three semesters in a row on the Dean's List.

Top Players Named

On the basis of voting by the coaches, analysts, editors, and fans, Greg Daust has been named UMSL's top defensive player while Daust tied with Jack Stenner for offensive honors. Daust was named outstanding defensive player in seven games this season while Stenner and Daust were each named offensive star in eleven games. On the basis of hitting at least three free throws in each game, Verle Sutton was named the team's best free throw shooter, "Verle the Freez" hit 77 of 102 charity tosses this season for a .755 percentage.

"A computer has no mind of its own. Its 'brainpower' comes from the people who create the programs," says Rod Campany.

Rod earned a B.S. in Math in 1966. Today, he's an IBM Systems Programmer working on a portion of Operating System/360, a hierarchy of programs that allows a computer to schedule and control most of its own operations.

A mixture of science and art
"Programming" means writing the instructions that enable a computer to do its job. Says Rod, "It's a mixture of science and art. You're a scientist in the sense that you have to analyze problems in a completely logical way. "But you don't necessarily hunt for an ultimate right answer. There can be as many solutions to a programming problem as there are programmers. That's where the art comes in. Any given program may work, but how well it works depends entirely on the ingenuity of the programmer."

Programmers hold a key position in the country's fastest growing major industry—information processing. Business Week reports that the computer market is expanding about 20 percent a year.

Programming at IBM
"It's a chance to use everything you've got."

You don't need a technical degree
If you can think logically and like to solve problems, you could become an IBM programmer no matter what your major. We'll start you off with up to twenty-six weeks of classroom and practical training.

Check with your placement office
If you're interested in programming at IBM, ask your placement office for more information.
